### SOURCE

The root of *Sophora japonica*.

### BIOLOGICAL ACTIVITY OR INHIBITORS

Matrine, an alkaloid purified from the chinese herb *Sophora flavescens* Ait, is well known to possess activities including anti-inflammation, anti-fibrotic and anticancer, it could inhibit cell proliferation and induce apoptosis of SGC-7901 cells in vitro by up-regulating Fas/FasL expression and activating caspase-3 enzyme.[1]

Matrine upregulates the cell cycle protein E2F-1 and triggers apoptosis via the mitochondrial pathway in K562 cells, it is a potential anti-drug.[2]

Matrine suppresses PMA-induced MMP-1 expression through inhibition of the AP-1 signaling pathway and also may be beneficial for treatment of some inflammatory skin disorders.[3]

Matrine can induce gastric cancer MKN45 cells apoptosis via increasing pro-apoptotic molecules of Bcl-2 family, also inhibits matrix metalloproteinase-9 expression and invasion of human hepatocellular carcinoma cells.[4,5]

Matrine can improve 2,4,6-trinitrobenzene sulfonic acid (TNBS)-induced colitis in mice and the therapeutic mechanism might be related to the reduction of up-regulated colonic TNF- $\alpha$  production caused by TNBS.[6]

Matrine seems to be a novel autophagy inhibitor that can modulate the maturation process of lysosomal proteases.[7]

Matrine can reduce the mortality of acetaminophen overdosed mice more effectively, attenuate acetaminophen-induced hepatotoxicity, and reduces the number and area of  $\gamma$ -GT positive foci, thus protecting liver function and preventing HCC from occurring; it also has a protective effect on immunosuppression, a strong non-specific anti-inflammatory effect, and an effect of reducing the incidence of sodium and water retention.[8]
