BIOLOGICAL ACTIVITY OR INHIBITORS

Mahanine can enhance cisplatin-induced apoptosis and reduce its effective concentration 5-8 folds, it also inhibits JAK1 and Src and subsequently promote proteasome-mediated degradation of STAT3; reveals that mahanine may be a prospective agent to reduce the concentration of cisplatin in adjunct for the treatment of cancer and thereby decreasing its [1]

values of 6.25 and 12.5 ug/mL, respectively.

Mahanine inhibits growth and induces apoptosis in both androgen-responsive, LNCaP and androgen-independent, PC3 prostate cancer cells by targeting cell survival [3]

it promises an encouraging therapeutic choice for advanced prostatic cancer.

Mahanine, a carbazole alkaloid is a potent anticancer molecule, a DNA minor groove binding agent exerts cellular cytotoxicity with involvement of C-7-OH and -NH functional [5]

toxicity.

Mahanine shows antimutagenicity against heterocyclic amines such as Trp-P-1 with an IC50 of 5.2 uM, cytotoxicity against a tumor cell line HL60 with a MIC100 of 4.0 ug/mL, and antimicrobial activity against Bacillus cereus and Staphylococcus aureus with MIC100 [2]

pathway.

Mahanine can reverse an epigenetically silenced gene, RASSF1A in prostate cancer cells by inhibiting DNMT activity that in turn down-regulates a key cell cycle regulator, cyclin D1; [4]

groups.

Mahanine induces apoptosis involved reactive oxygen species (ROS)-mediated nuclear accumulation of PTEN and its interaction with p53/p73; it and 5-FU in combination exerted synergistic inhibitory effect on cell viability, this combination also enhances ROS production, increases tumour suppressor proteins and suppresses chemo-migration; reveals that mahanine can be a potential chemotherapeutic agent with efficacy to reduce [6]

the concentration of toxic 5-FU in colon cancer.

Mahanine is a novel mitochondrial complex-III inhibitor induces G0/G1 arrest through redox alteration-mediated DNA damage response and regresses glioblastoma [7]

[7]

Mahanine has apoptotic effects on human leukemic cells, mediated through crosstalk
